2016 - 2018

Travel Designer - Tasmania Coachline
Design travel plan for individual and group clients, also use accounting tools to manage business financial issues with accounting team.

Lance Liu

WEB DEVELOPER

Dear Team

I am currently studying to be a web developer. Through 4 months of self-study and 3-month school study, now I am good at using HTML, CSS and JavaScript to design a website to achieve different users expectations. Please find my portfolio beta-version (https://lanceliu.netlify.app). I built it using HTML5, CSS, JS functions and JQuery. I try only to display my website design skills using the portfolio website, so there is a lot of placeholder text.

Recently, I completed my Ruby programming study and built a terminal application by Ruby and Ruby gems. According to this experience, I understand how to use Test Driven Development(TDD) to make sure I write testable code and use Rspec to test my code to make them reliable.

In the following two semesters, I will complete Ruby on Rails, more Javascript, Node.js, and React study.

After finishing my studies, I can build a more reliable, functional website or application. And through my previous five years of work experience, I also know how to integrate it with my new CS knowledge, how to carry out project management, how to involve in teamwork, and how to accomplish customer needs.
